

GIT上传文件流程

1.设置用户邮箱、ssh密钥获取

查看邮箱信息

cat ~/.gitconfig

```
stone@stone-HP-Laptop-14-gr0xxx:~/work/108/gros/release/c30/mr813$ cat ~/.gitconfig
[user]
  email = jie.chen@zbeetle.com
  name = chenjie
```

若没有邮箱信息情况

git config --global user.name (用户名) zhangyicheng

git config --global user.email (企业邮箱) cheng.yi@zbeetle.com

cat ~/.gitconfig

Ubuntu生成密钥

ssh-key

ssh-keygen

```
hrj@hrj-Lenovo-Rescuer-15ISK:~$ git config --global user.email yicheng.zhang@zbe
etle.com
hrj@hrj-Lenovo-Rescuer-15ISK:~$ rm -rf .ssh/id_rsa.pub
hrj@hrj-Lenovo-Rescuer-15ISK:~$ ssh-key
ssh-keygen  ssh-keyscan
hrj@hrj-Lenovo-Rescuer-15ISK:~$ ssh-keygen
Generating public/private rsa key pair.
Enter file in which to save the key (/home/hrj/.ssh/id_rsa):
/home/hrj/.ssh/id_rsa already exists.
Overwrite (y/n)?
```

(选y)

\$ cat .ssh/id_rsa.pub

```
hrj@hrj-Lenovo-Rescuer-15ISK:~$ cat .ssh/id_rsa.pub
ssh-rsa AAAAB3NzaC1yc2EAAAADAQABAAQgQDMj/7m4YzaW5fDJsv/m2/TqsyyggjgVbL/B8/Qa23hf
bxQ0qF9qv6384btgg3EqvM9j91e/nPzHvxnQfQgVmGd1DeKrySvQ4uzJs1fPh6UjY/EbXD1WwPK/msv1
qGbig8fnGT3gqFfINPIrIQX3p4nHXRgVFt9mXSb1wPnRdybL/Twd0mqTyITLXZr1KmrAu8Y+zGS0GsZh
r1CA/UTrjkABpuilMUP7v/C4u1RTYz1MTlLoHkmK5wget+N77FBC6hWgnWs9NXdhWQ8esarLRTfosVjZ
p1Scr/UssAF/rvH+UIEaV06LdQ+xlyfyKEFnW+98oGoYqK2NdywRKt8VDJ/hQBix0xW0YyysszB5euyY
KL8AoHdXH8cLZY0hueW4+qvsMTzRgx8lgJuhA5fWLrdSrCIeB0oZlB0qW/xilE0fZmZ49+f1UNKtUknx
mw8DmIh5AEbMYLdJ+KZKdrK4maU/WearRRjUMjbG+rhdjS+B8TrMVsyMcnEH1QyXsZM16cyE= hrj@hrj
-Lenovo-Rescuer-15ISK
```

ps: 若出现密钥已被使用的情况

```
rm -rf .ssh/id_rsa.pub
```

删除密钥后重复以上操作

Ubuntu生成密钥2

在终端，复制并粘贴以下命令

```
代码块
1 ssh-keygen -t ed25519 -C "your_email@zbeetle.com"
```

几次回车生成

```
代码块
1 cat ~/.ssh/id_ed25519.pub
```

运行 `cat ~/.ssh/id_ed25519.pub`

完整复制输出的所有内容（从 `ssh-ed25519` ... 一直到最后的邮箱地址）。

粘贴到 GitHub 或 GitLab 的 "SSH Keys" 设置页面中。

链接仓库并上传文件

1.初始化init

git init

初始化后会在文件夹里生产 .git 隐藏文件

2.克隆仓库地址

git remote add origin (仓库地址)http://192.168.136.51:8081/LuoGuiBin/hello_world.git

3.上传文件

git status #查看提交状态

git add (文件名称) or git add * #提交全部文件

git commit -m "change_file_12345" #上传注释

git push -u origin master
